APPENDIX 1

PROCESS: RDE SPECTROMETRY OF OILS

Performed in accordance with the following documents:

- ASTM D6595

With the following resources:

- RDE SPECTRO - Spectroil

This Qualification is based on the following results:

-EUROCOPTER Audit report: 2009-1016

-EUROCOPTER Test report : 2009-3071

The Qualification is subject to the following specific conditions:

For the limit used for the SOAP analysis on the mechanics components of EC's fleet of helicopter :

- For EC 135 : the factor of 1.6 must be used to multiply the EC iron limits (given for ICP Spectrometry)
- For others helicopters : the limits define for the rotode methodology should be used for the survey of the mechanics.

Restrictions:

None

This qualification may be suspended or cancelled at any time if there is degradation in the services provided, or if an audit determines the Quality Assurance System ineffective.

All changes impacting the scope of approval must be submitted to Eurocopter for acceptance.
